

FIELD OF PROFICIENCY: DIGITAL LINGUISTIC EDUCATIONAL CONTENT DESIGNS

This program is taught in English. Both Russian and foreign citizens with a bachelor's degree in Linguistics, Philology, Cultural Studies, Journalism, or Regional Studies are accepted for this specialized master's program. The program prepares specialists with expertise in linguistics, pedagogy, and information technology.

GRADUATES' PROFESSIONAL ACTIVITIES INCLUDE:

- teaching foreign languages (English) using intelligent technologies;
- creating educational resources and training programs in a digital environment;
- consulting in the design of digital educational environments;
- education and science (implementing basic general education programs, secondary vocational education programs, higher education, and additional educational programs).

GRADUATES OF THIS PROGRAM WILL BE ABLE TO:

- design content and training technologies in foreign languages (English);
- apply modern pedagogical technologies, including in a digital educational environment;
- create digital educational environments, online courses, interactive educational platforms, and linguistic simulators;
- provide consulting services on the design of digital educational environments; and serve as a content manager for language applications;
- promote digital educational products in the educational environment.

KEY PROFESSIONAL DISCIPLINES:

- Methods and techniques for language teaching
- Assessment methods and design
- Gamification and game-based learning
- Foreign language in professional activities

EMPLOYMENT

Masters of Linguistics students can pursue careers in linguistic education, intercultural communication, and public relations. During their studies, students complete internships and pregraduation practical training at MIEL and partner schools in Irkutsk, as well as at Irkutsk State University College.
